

# PRODUCT DATA SHEET

## DELTA GAS BARRIER

**Delta Gas Barrier provides permanent protection from Radon. It also forms a protection layer against rising damp.**

Delta Gas Barrier is extremely durable and tough reducing the risk of damage to the membrane on installation. The anti-slip profile on both sides stabilises the sheet and optimises adhesion to mortar.

# PRODUCT DATA SHEET

## DELTA GAS BARRIER

### BENEFITS

- Gas Barrier membrane will not crack even at low temperatures and its flexibility allows it to bend around corners easily.
- When used with DELTA® gas resistant dpc and preformed units the system offers a completely sealed solution to penetration of gases and ingress of dampness from below ground and through cavity walls.
- DELTA® Gas Barrier System is compatible with bitumen, resistant to degradation and UV-stabilised. Tightly sealed with products from the DELTA® range of adhesives, the DELTA® membrane becomes a barrier that is highly effective on overlaps and seams.

### SPECIFICATION

- NBS Specification J40 295A flexible sheet tanking/damp proofing

### ASSOCIATED PRODUCTS

- NP Drain
- Geo-Drain Quattro
- Delta Gas Barrier
- Floraxx
- Delta Than

# PRODUCT DATA SHEET

## DELTA GAS BARRIER

### TECHNICAL DATA

Material	Polyolefin
Colour	Black
Surface	Chequered, rough
Weight	approx 280 g/m <sup>2</sup>
Thickness	0.4mm
Width	50/150/400cm
Folded	4 x 8m
Resistance	Compatible with bitumen
Water Column	4m, 72h
