

Striving for continuous industry improvements

Throughout 2018 DELTA MEMBRANE SYSTEMS LIMITED invested in technologies which continues to lead the field in innovations within the waterproofing sector. Our range of Waterproofing, Damp Proofing and Ground Gas Protection Solutions offer Specifiers, Architects, Constructors, Civil Engineers and home owners alike a one stop-shop for all their Structural Waterproofing needs.

Flexi Dri Plus Plug

Delta Membrane Systems Limited, is pleased to announce that it has been successful in its application for a new patent in respect of its Flexi Dri Plus Plug, a new achievement that strengthens the company's portfolio.

Delta has been awarded patent number 2698550 by the European Patent Office for innovating the Flexi Dri Plus Plug.

What is a Flexi Dri Plus Plug?

Flexi Dri Plus Plugs are a handy hammer-in fixings which contain an expandable

waterproof seal for use with cavity drain membranes for use on multiple substrates. The Flexi Dri Plus Plug offers a bellows action, meaning it can expand without splitting (as was the case with the older-style cob plug). This is unique to Delta because it can be used BELOW GROUND.

Newly designed website

We were delighted to launch our newly designed website. Our goal was to create a user-friendly browsing experience for our trusted and valued customers and business partners alike.

Our fantastic new mobile friendly website will offer an easier, fresh approach understanding structural waterproofing.

Advance your product knowledge with access to our resource section with guides, technical drawings, independent test data and approvals.

Visit our Case studies page for a useful understanding of how different products within projects fit together and how different elements work in creating a robust solution.

Sounding out multi-purpose venues

The Folkehuset Absalon in Copenhagen is an excellent example of the growing trend towards multi-use and multi-purpose cultural social centres. Designed to promote community cohesion with a flexible space to accommodate a variety of activities and services, multi-purpose venues are used to support everything from sport, leisure and learning through to childcare, heritage, culture, elderly needs, tourism, pop-up shops and events. This award-winning project designed by Arcgency architects has taken a former Church with its high ceilings and transformed it into a flexible community centre with 'living-room' feel. Trolldtekt panels are frequently specified for these types of projects as a key way to control acoustics. If acoustic absorption is wrong, discomfort and irritation will result from the reverberations. If they are designed well, the participant's interest will increase. The benefits of 100 per cent Trolldtekt natural wood wool panels include high sound absorption, high durability, natural breathability, low cost life cycle performance and sustainability as documented by Cradle to Cradle certification at silver level.

P C Henderson expands its range of sliding barn door style hardware

P C Henderson has introduced a number of new additions to its range of Rustic sliding barn door hardware – including a new top mounted version and a new 'antique rust effect' finish. The new Rustic Top Mount offers a stylish, contemporary twist on the company's classic Rustic 80 system with its matt black hangers being mounted to the top of the door. The company has also introduced a new 'antique rust effect' finish to its classic Rustic 80 system to further complement the range. The company has also recently launched its new Rustic Soft Stop system – an extremely easy to fit accessory which can be installed onto new or existing applications. The sophisticated system catches the door in its final moments of travel and pulls it gently into its final position, preventing slamming and adding to the overall longevity of the product. Ideal for barn and warehouse conversions, period properties or simply for a distinctive feature in the home, the system caters for interior wooden doors weighing up to 80kg and is available in 2000mm and 3000mm track lengths. Tested to over 100,000 cycles, the system guarantees a smooth and quiet system which will withstand the test of time. The classic Rustic 80 system is available in matt black, stainless steel or the newly added antique rust effect and the Rustic Top Mount available in matt black.
