

Description

Delta Amphibia Stoppers are a great solution for sealing structural concrete formwork spacers (DYWIDAGs).

The Tie Bar is inserted through the Tie Bar Sleeving and Tie Bar Cone. The Waler Plates are secured to the outside of the formwork using the Wing Nut. The Tie Bolt Cones can be removed once striking of the formwork has taken place and the hole filled with Delta Amphibia Stoppers to produce a watertight seal to the surface of the finished concrete.

Manufacturer's recommendation is to apply a seal of Delta Bi Mastic around the Delta Amphibia Stoppers when sealing formwork spaces (DYWIDAGs).

Fields of Application

- Protective Stopper to close formwork holes

Specification

- BS 8102:2022 Protection of below ground structures against water ingress. Code of practice.
- NBS J40 / 130 – Flexible Sheet Tanking / waterproofing

Product Details

DMS 1042

Technical Data

Delta Amphibia Stoppers

Colour	Black
Contents/Packaging	Box of 20

Associated Products

- Delta Amphibia Membranes
- Delta Amphibia AKTI-VO 201
- Delta Amphibia BI Mastic
- Delta Amphibia Pressure Corner 90°
- Delta Amphibia Pressure Line
